

Oxygen Barrier Silage Film

2 Mil Oxygen Barrier Silage Film

Reducing feed spoilage saves you money!

Research shows that oxygen barrier silage film can reduce spoilage loss by 5% or more. With a bunker silo capacity of 3,000 tons, the net savings could be \$3,000-\$5,000. In a 3000-ton capacity drive-over pile, the net savings could be as high as \$9,000.

Protecting your silage from oxygen also improves consistency of feed in your pile, resulting in higher feed quality and increased nutritional value for your animals. When protected by our 5 or 6 Mil Black & White Bunker Cover, our Oxygen Barrier Film can virtually eliminate surface spoilage on your silage pile.

KSI Supply is the exclusive distributor of RKW HYPLAST Oxygen Barrier Film in the U.S.

Key Features and Benefits:

- Specialized nylon construction for durability with outstanding oxygen barrier properties.
- Engineered to quickly conform to the contours of your silage pile and eliminate air pockets.
- Blocks up to 20 times more oxygen transmission than standard black and white bunker cover alone. Available individually or as part of our exclusive HytiDouble 2-in-1 Bunker Cover.

Recyclable Plastic

UV Protection

100% Virgin Resins
